Profile

Computer Science student at Loughborough University, on track for First-Class Honours and seeking a 2027–28 placement in software engineering, full-stack development or a related technology role. Experienced in building real-time and object-oriented applications using TypeScript, JavaScript, Java, Python, C, C# and SQL. Strong problem-solving, communication and teamwork developed through technical projects, client-facing employment, event security and competitive rugby.

Education

BSc Computer Science, Loughborough University	On track for First-Class Honours	Sep 2025 – Jul 2029
--	----------------------------------	----------------------------

Relevant modules:

- | | |
|--|--|
| <ul style="list-style-type: none">• Foundations of Artificial Intelligence• Fundamentals of Software Engineering• Operating Systems, Networks and Security | <ul style="list-style-type: none">• Introduction to Programming and Databases• Computer Systems and Low-Level Programming |
|--|--|

The Champion School: A-Level Mathematics (A), Further Mathematics (B), Computer Science (B) Sep 2023 – May 2025
GCSEs: 7 grades 7–9, including Mathematics (8) and English Language (7)

Technical Skills

Programming: TypeScript, JavaScript, HTML, CSS, Python, Java, C, C#, SQL

Web and Backend: Next.js, React, Node.js, Express, Socket.IO, Supabase, Redis, REST APIs

Tools and Platforms: Git, GitHub, Linux, Visual Studio Code, PyCharm, Eclipse, Unity, Excel

Core Knowledge: Object-oriented programming, database design, authentication, real-time systems, debugging, version control

Projects

Imagine Debate – Real-Time Debate Platform	GitHub Repository
---	-------------------

Next.js, TypeScript, Node.js, Socket.IO, Supabase, SQL, Redis

- Developed a full-stack web application that allows two authenticated users to join private debate rooms, choose opposing positions and participate in timed, structured debates.
- Implemented real-time messaging, turn management, readiness controls, debate stages, reconnection handling and state synchronisation using Socket.IO.
- Persisted debates and messages in Supabase, integrated authentication, and debugged frontend, backend and local-network issues across multiple devices.
- Prototyped an AI judging workflow using Supabase Edge Functions to assess arguments on logic, evidence, rebuttal quality and clarity.

Snappy Wing – 2D Arcade Game	GitHub Repository
-------------------------------------	-------------------

Unity, C#, Visual Studio Code

- Built a 2D arcade game using modular C# scripts for player movement, physics, scoring, collision detection, obstacle spawning and overall game flow.
- Created a parallax background using animated texture offsets and refined gameplay through repeated testing of timing, movement and collision behaviour.

Higher Lower Card Game	GitHub Repository
-------------------------------	-------------------

Java, Eclipse

- Applied object-oriented programming to create and shuffle a deck, draw cards, validate console input, calculate scores and support replayable game sessions.
- Strengthened Java fundamentals, control-flow design and debugging by separating game responsibilities into clear, maintainable components.

Experience

Security Steward, Alliance Management Group

Mar 2026 – Present

- Support access control, ticket scanning, crowd movement and guest safety at live, public and corporate events while following security procedures and communicating clearly with colleagues and attendees.
- Directed corporate and VIP guests to allocated areas at Taste of London, using situational awareness and calm decision-making to maintain an organised and professional guest experience.
- Help prevent issues from escalating by giving clear instructions, responding appropriately to changing situations and working closely with the wider security team.

Hospitality Waiter, Wembley Stadium

Jul 2026

- Delivered hospitality service during a My Chemical Romance concert at Wembley Stadium, supporting guests in a high-volume, fast-paced live-event environment.
- Worked closely with the wider hospitality team to maintain efficient service and a professional guest experience while responding calmly to changing demands.

Data Work Experience, Lloyds Banking Group

Aug 2025

- Completed a two-day virtual programme covering how data is collected, stored, analysed and applied to support business decisions.
- Used beginner and intermediate Excel functions during practical tasks, strengthening data handling, analytical thinking and the communication of findings.

Rugby Match Official, SuperSport

May 2025

- Officiated 26 U9 and U10 rugby matches across a two-day tournament, making quick, impartial decisions and communicating them clearly to players and coaches.
- Maintained concentration throughout long match days and ensured games remained safe, fair and well structured.

Cleaner, Powerhouse International Ministries

Aug 2020 – Sep 2025

- Maintained high standards every weekend over five years, demonstrating long-term reliability, self-management and consistent attention to detail.

Professional Development

KPMG Insight Event

Aug 2025

- Completed workshops on professional communication, interviews and career pathways, developing commercial awareness, networking confidence and the ability to present experiences clearly.

Certificates and Badges

- Lloyds Banking Group Data Work Experience Certificate
- SQL Databases Badge
- Python Programming Skills Badge

Additional Technical Experience

Completed university work in A* pathfinding, SQL databases, object-oriented system design and low-level programming, applying algorithmic reasoning, structured testing and debugging across multiple languages.

Interests

Rugby: Played for Romford and Gidea Park's men's first team and at academy level, developing discipline, resilience and the ability to balance competitive sport with academic commitments.
